EDUCATION

University of Illinois Urbana Champaign

August 2024 - May 2026

Master of Science, Information Management

GPA: 3.8/4

• Coursework: Web Programming, Machine Learning & Cloud, Information Management, Information Consulting, Methods of Data Science

University of Mumbai

June 2019 - May 2023

Bachelor of Engineering, Computer Science

GPA: 9.25/10

• Coursework: Data Structures & Algorithms, Operating Systems, Computer Networks, Object-Oriented Programming, Machine Learning, NLP

SKILLS

• **Languages:** Python, SQL, Java(leetcode), C++(leetcode)

• **Data Engineering:** ETL/ELT Pipelines, Data Modeling, Snowflake, PySpark, Workflow Orchestration (Airflow, Step Functions, AWS Glue)

• **Cloud & Tools:** Azure (ADF, Synapse, Data Lake), Databricks, Delta Lake, Microsoft Fabric, T-SQL, Azure DevOps, Terraform

WORK EXPERIENCE

University of Illinois Urbana Champaign

May 2025 - Present

Research Assistant - iSchool

Champaign, USA

• Built and maintained scalable data pipelines across Azure and AWS cloud environments, enabling distributed data storage and downstream analytics consumption at scale

• Designed and optimized T-SQL data models and medallion-style warehouse layers in PostgreSQL, applying indexing and query tuning techniques to improve performance by 38%

• Implemented ETL workflow orchestration using Azure Data Factory and AWS Step Functions, adding data quality checks, logging, retries, and failure handling to ensure pipeline reliability

Research Assistant - CHI AI in Infodemic Management

January 2025 - May 2025

• Designed and deployed **scalable ELT pipelines** in **Python** for high-volume social media datasets in distributed environments, reducing processing latency by 41%

• Built distributed real-time ingestion pipelines using **Kafka** and **Neo4j**, enabling streaming data processing, transformation, and graph-based analytics at scale

• Applied Delta Lake and distributed data processing principles to manage large-scale streaming data, ensuring consistent data availability and analytics-ready quality across systems

Business Intelligence Group

August 2025 - December 2025

Technical Consultant

Champaign, USA

• Designed and delivered scalable data engineering solutions for consulting clients, building pipelines using FastAPI, PostgreSQL, and optimized storage layers for analytics and reporting

• Designed fault-tolerant **ETL workflows** for ingesting and transforming high-volume document datasets, ensuring low-latency and reliable data

• Implemented CI/CD workflows using Azure DevOps and Git to enable reliable, automated deployment and real-time data querying across distributed high-availability environments

Swift Mobil Software Solutions Provider

July 2023 - October 2023

Data Analyst

Mumbai, IN

• Built **data pipelines** feeding **Power BI dashboards** for logistics KPIs, reducing reporting time by **40%** and improving data availability for business decision-making

• Processed large-scale datasets using **Python** and **PySpark distributed processing**, implementing transformations and aggregations for performance monitoring

• Developed **SQL queries** to validate, reconcile, and analyze operational data, improving data quality and speeding root-cause analysis by **26%**

Pscope Technologies Pvt. Ltd.

January 2023 - June 2023

Data Analyst

Mumbai, IN

• Built and maintained T-SQL data pipelines supporting Power BI dashboards and semantic models, designing dimensional warehouse models and ensuring analytics-ready data delivery across business functions

• Automated **data transformation workflows** using VBA, implementing validation checks, error handling, and scheduling logic to streamline large-scale data processing and cut reporting time by **42%**

Stu/Dio at Illinois

August 2025 - Present

Project Manager

Champaign, USA

• Led cross-functional team of 6 to deliver data engineering solutions, documenting technical designs and communicating findings to both technical and non-technical stakeholders

• Managed **Agile workflows** using JIRA, tracking delivery, QA issues, and sprint progress to ensure timely and reliable releases

PROJECTS

Scalable ML System for Customer Risk Prediction

March 2025

UIUC Hackathon

• Built an **end-to-end data pipeline** using Python, Pandas, and LightGBM to process large-scale **time-series** transaction data, including ingestion, transformation, feature engineering, and model integration

• Designed and implemented **scalable ETL and feature engineering pipelines** for large datasets, capturing behavioral trends and temporal patterns to improve model performance

• Developed a **data-driven decision framework**, incorporating pipeline outputs and risk thresholds to improve prediction precision by 20% and enable scalable analytics workflows
