EDUCATION

University of Illinois Urbana Champaign

August 2024 - May 2026

Master of Science, Information Management

GPA: 3.8/4

• Coursework: Web Programming, Machine Learning & Cloud, Information Management, Information Consulting, Methods of Data Science

University of Mumbai

June 2019 - May 2023

Bachelor of Engineering, Computer Science

GPA: 9.25/10

• Coursework: Data Structures & Algorithms, Operating Systems, Computer Networks, Object-Oriented Programming, Machine Learning, NLP

SKILLS

• **Languages:** Python, SQL, Java(leetcode), C++(leetcode)

• **Data Engineering:** ETL/ELT Pipelines, Data Modeling, Snowflake, PySpark, Workflow Orchestration (Airflow, Step Functions, AWS Glue)

• **Cloud & Tools:** AWS (S3, EC2, EKS), PostgreSQL, Neo4j, Git, CI/CD, Docker

WORK EXPERIENCE

University of Illinois Urbana Champaign

May 2025 - Present

Research Assistant - iSchool

Champaign, USA

• Built and maintained AWS-based scalable data pipelines to ingest and combine high-volume data from multiple sources for 100+ users, enabling distributed S3 storage and downstream analytics consumption

• Designed and optimized SQL-based data models and warehouse tables in PostgreSQL, applying indexing and query tuning to improve performance by 38% and ensure data quality and reliability across large-scale datasets

• Implemented workflow orchestration using AWS Step Functions for real-time data acquisition and streaming pipelines, integrating data quality checks, logging, retries, and failure handling to ensure reliability

Research Assistant - CHI AI in Infodemic Management

January 2025 - May 2025

• Designed and deployed scalable ELT pipelines in Python for high-volume datasets in distributed environments, applying data mining and segmentation techniques to reduce processing latency by 41%

• Built distributed real-time ingestion pipelines using **Kafka** and **Neo4j**, enabling streaming data processing, transformation, and graph-based analytics at scale

• Applied **distributed data processing and big data principles** to handle large-scale streaming data and ensure consistent data availability across systems

Business Intelligence Group

August 2025 - December 2025

Technical Consultant

Champaign, USA

• Built and deployed scalable **data processing pipelines** using **FastAPI**, **PostgreSQL**, and optimized storage layers to support large-scale analytics and downstream applications

• Designed fault-tolerant **ETL workflows** for ingesting and transforming high-volume document datasets, ensuring low-latency and reliable data

• Developed backend services and used **Git-based CI/CD workflows** to enable reliable deployment and real-time querying across distributed and high-availability environments

Swift Mobil Software Solutions Provider

July 2023 - October 2023

Data Analyst

Mumbai, IN

• Built and maintained SQL-based data pipelines supporting enterprise BI dashboards, designing data warehouse models and applying data mining techniques to ensure delivery of analytics-ready datasets for Fortune 500 stakeholders

• Processed large-scale datasets using Python and PySpark, implementing transformations, aggregations, and statistical analysis to interpret trends and patterns in operational performance data

• Developed **SQL queries** to validate, reconcile, and analyze operational data, improving data quality and speeding root-cause analysis by **26%**

Pscope Technologies Pvt. Ltd.

January 2023 - June 2023

Data Scientist

Mumbai, IN

• Built and maintained **SQL-based data pipelines** supporting **Power BI dashboards**, designing data warehouse models, writing complex joins and aggregations, and ensuring delivery of analytics-ready datasets across business functions

• Automated **data transformation workflows** using VBA, implementing validation checks, error handling, and scheduling logic to streamline large-scale data processing and cut reporting time by **42%**

Stu/Dio at Illinois

August 2025 - Present

Project Manager

Champaign, USA

• Consolidated and analyzed 500+ user feedback signals and gameplay telemetry records, creating structured datasets that accelerated feature prioritization by 35%

• Managed **Agile workflows** using JIRA, tracking delivery, QA issues, and sprint progress to ensure timely and reliable releases

PROJECTS

Scalable ML System for Customer Risk Prediction

March 2025

UIUC Hackathon

• Built an end-to-end data pipeline using Python, Pandas, and LightGBM to prepare large-scale time-series transaction data for prescriptive and predictive modeling, including ingestion, transformation, and feature engineering

• Designed and implemented scalable ETL pipelines and prototype algorithms for large datasets, capturing behavioral trends and temporal patterns such as rolling averages and spending frequency to improve model performance

• Developed a **data-driven decision framework**, incorporating pipeline outputs and risk thresholds to improve prediction precision by 20% and enable scalable analytics workflows
