EDUCATION

University of Illinois Urbana Champaign

August 2024 - May 2026

Master of Science, Information Management

GPA: 3.8/4

• Coursework: Web Programming, Machine Learning & Cloud, Information Management, Information Consulting, Methods of Data Science

University of Mumbai

June 2019 - May 2023

Bachelor of Engineering, Computer Science

GPA: 9.25/10

• Coursework: Data Structures & Algorithms, Operating Systems, Computer Networks, Object-Oriented Programming, Machine Learning, NLP

SKILLS

• **Languages:** Python, SQL, Java(leetcode), C++(leetcode)

• **Data Engineering:** ETL/ELT Pipelines, Data Modeling, Snowflake, PySpark, Workflow Orchestration (Airflow, Step Functions, AWS Glue)

• **Cloud & Tools:** AWS (S3, EC2, EKS), PostgreSQL, Neo4j, Git, CI/CD, Docker

WORK EXPERIENCE

University of Illinois Urbana Champaign

May 2025 - Present

Research Assistant - iSchool

Champaign, USA

• Built and maintained cloud-based scalable data pipelines on AWS and GCP to ingest high-volume data for 100+ users, enabling distributed cloud storage and downstream analytics consumption in BigQuery-compatible formats

• Designed and optimized **SQL-based data models and warehouse tables** in PostgreSQL, applying indexing and query tuning techniques to improve performance by 38% for large datasets

• Implemented pipeline workflow orchestration using Airflow-compatible patterns and AWS Step Functions, adding data quality checks, monitoring, and failure handling to ensure streaming and batch pipeline reliability

Research Assistant - CHI AI in Infodemic Management

January 2025 - May 2025

• Designed and deployed scalable ELT pipelines in Python and PySpark for high-volume datasets across distributed cloud environments, supporting both batch and real-time processing with 41% latency reduction

• Built distributed real-time ingestion pipelines using Kafka and event streaming technologies for high-throughput data processing, transformation, and enterprise-scale analytics

• Applied **distributed data processing and big data principles** to handle large-scale streaming data and ensure consistent data availability across systems

Business Intelligence Group

August 2025 - December 2025

Technical Consultant

Champaign, USA

• Built and deployed scalable data processing pipelines using Python, PostgreSQL, and optimized data lake storage layers to support large-scale analytics, reporting, and downstream machine learning applications

• Designed fault-tolerant **ETL workflows** for ingesting and transforming high-volume document datasets, ensuring low-latency and reliable data

• Developed data platform services and implemented Git-based CI/CD workflows with infrastructure-as-code patterns to enable automated, reliable deployment across distributed, high-availability data environments

Swift Mobil Software Solutions Provider

July 2023 - October 2023

Data Analyst

Mumbai, IN

• Built **data pipelines** feeding **Power BI dashboards** for logistics KPIs, reducing reporting time by **40%** and improving data availability for business decision-making

• Processed large-scale datasets using **Python** and **PySpark distributed processing**, implementing transformations and aggregations for performance monitoring

• Developed **SQL queries** to validate, reconcile, and analyze operational data, improving data quality and speeding root-cause analysis by **26%**

Pscope Technologies Pvt. Ltd.

January 2023 - June 2023

Data Scientist

Mumbai, IN

• Built and maintained SQL-based data pipelines and data warehouse models, implementing data quality checks and governance controls to ensure delivery of accurate, analytics-ready datasets across business functions

• Automated **data transformation workflows** using VBA, implementing validation checks, error handling, and scheduling logic to streamline large-scale data processing and cut reporting time by **42%**

Stu/Dio at Illinois

August 2025 - Present

Project Manager

Champaign, USA

• Consolidated and analyzed 500+ user feedback signals and gameplay telemetry records, creating structured datasets that accelerated feature prioritization by 35%

• Managed **Agile workflows** using JIRA, tracking delivery, QA issues, and sprint progress to ensure timely and reliable releases

PROJECTS

Scalable ML System for Customer Risk Prediction

March 2025

UIUC Hackathon

• Built an end-to-end data pipeline using Python, PySpark, and LightGBM to process large-scale time-series transaction data, supporting machine learning workflows through scalable ingestion, transformation, and feature engineering

• Designed and implemented **scalable ETL and feature engineering pipelines** for large datasets, capturing behavioral trends and temporal patterns to improve model performance

• Developed a **data-driven decision framework**, incorporating pipeline outputs and risk thresholds to improve prediction precision by 20% and enable scalable analytics workflows
