EDUCATION

University of Illinois Urbana Champaign

August 2024 - May 2026

Master of Science, Information Management

GPA: 3.8/4

• Coursework: Web Programming, Machine Learning & Cloud, Information Management, Information Consulting, Methods of Data Science

University of Mumbai

June 2019 - May 2023

Bachelor of Engineering, Computer Science

GPA: 9.25/10

• Coursework: Data Structures & Algorithms, Operating Systems, Computer Networks, Object-Oriented Programming, Machine Learning, NLP

SKILLS

• **Languages:** Python, SQL, Java(leetcode), C++(leetcode)

• **Data Engineering:** ETL/ELT Pipelines, Data Modeling, Snowflake, PySpark, Workflow Orchestration (Airflow, Step Functions, AWS Glue)

• **Cloud & Tools:** AWS (S3, EC2, EKS), PostgreSQL, Neo4j, Git, CI/CD, Docker

WORK EXPERIENCE

University of Illinois Urbana Champaign

May 2025 - Present

Research Assistant - iSchool

Champaign, USA

- Built and maintained AWS-based scalable data pipelines to ingest high-volume data for 100+ users, enabling distributed S3 storage with Delta Lake-structured layers for downstream analytics and AI consumption
- Designed and optimized SQL-based data models and lakehouse tables, applying indexing and query tuning techniques to improve platform performance by 38%, enabling reliable data access for analytics and AI use cases
- Implemented pipeline workflow orchestration using AWS Step Functions and Databricks-compatible workflow patterns, adding data quality checks, logging, retries, and failure handling to ensure data platform reliability

Research Assistant - CHI AI in Infodemic Management

January 2025 - May 2025

- Designed and deployed scalable ELT pipelines in Python and PySpark on Databricks for high-volume datasets in distributed environments, reducing processing latency by 41% across batch and streaming workflows
- Built distributed batch and streaming ingestion pipelines using Kafka and PySpark Structured Streaming, enabling real-time data transformation and large-scale analytics in distributed data environments
- Applied **distributed data processing and big data principles** to handle large-scale streaming data and ensure consistent data availability across systems

Business Intelligence Group

August 2025 - December 2025

Technical Consultant

Champaign, USA

- Built and deployed scalable **data processing pipelines** using **FastAPI**, **PostgreSQL**, and optimized storage layers to support large-scale analytics and downstream applications
- Designed fault-tolerant ETL workflows for ingesting and transforming high-volume enterprise datasets, implementing data governance controls and monitoring to ensure reliable, compliant data availability at scale
- Developed data platform services and implemented Git-based CI/CD pipelines to enable automated, reliable deployment and real-time querying across distributed, high-availability data environments

Swift Mobil Software Solutions Provider

July 2023 - October 2023

Data Analyst

Mumbai, IN

- Built **data pipelines** feeding **Power BI dashboards** for logistics KPIs, reducing reporting time by **40%** and improving data availability for business decision-making
- Processed large-scale datasets using **Python** and **PySpark distributed processing**, implementing transformations and aggregations
- Developed **SQL queries** to validate, reconcile, and analyze operational data, improving data quality and speeding root-cause analysis by **26%**

Pscope Technologies Pvt. Ltd.

January 2023 - June 2023

Data Scientist

Mumbai, IN

- Built and maintained **SQL-based data pipelines** supporting **Power BI dashboards**, designing data warehouse models, writing complex joins and aggregations, and ensuring delivery of analytics-ready datasets across business functions
- Automated **data transformation workflows** using VBA, implementing validation checks, error handling, and scheduling logic to streamline large-scale data processing and cut reporting time by **42%**

Stu/Dio at Illinois

August 2025 - Present

Project Manager

Champaign, USA

- Consolidated and analyzed 500+ user feedback signals and gameplay telemetry records, creating structured datasets that accelerated feature prioritization by 35%
- Managed **Agile workflows** using JIRA, tracking delivery, QA issues, and sprint progress to ensure timely and reliable releases

PROJECTS

Scalable ML System for Customer Risk Prediction

March 2025

UIUC Hackathon

- Built an end-to-end analytics data pipeline using Python, PySpark, and LightGBM to process large-scale time-series transaction data, including ingestion, transformation, feature engineering, and machine learning model integration
- Designed and implemented **scalable ETL and feature engineering pipelines** for large datasets, capturing behavioral trends and temporal patterns to improve model performance
- Developed a **data-driven decision framework**, incorporating pipeline outputs and risk thresholds to improve prediction precision by 20% and enable scalable analytics workflows
