

Malhar Gudekar

(217) -766-0681 — gudekar2@illinois.edu — LinkedIn — Portfolio — GitHub

EDUCATION

University of Illinois Urbana Champaign

August 2024 - May 2026

Master of Science, Information Management

GPA: 3.8/4

• Coursework: Data Warehousing & Business Intelligence, Information Management, Information Consulting, Methods of Data Science

University of Mumbai

June 2019 - May 2023

Bachelor of Engineering, Computer Science

GPA: 9.25/10

• Coursework: DBMS, Big Data Analysis, Data Warehousing and Mining, Project Management, NLP, Machine Learning, Social Media Analytics

SKILLS

• **Analytical:** Data Analysis, Exploratory Data Analysis, Statistical Analysis, Trend Analysis, Root Cause Analysis, KPI Reporting, Data Validation, Data Cleaning, Anomaly Detection, ETL, Predictive Analytics

• **Programming / Querying:** Python, SQL, Pandas, NumPy, PySpark, PostgreSQL, Neo4j

• **Visualization / Reporting:** Power BI, Tableau, DAX, Excel, VBA, Dashboard Development, Data Visualization

• **Data / Cloud / Tools:** AWS S3, EC2, Redshift, EKS, FastAPI, Docker, Git, Kafka, pgVector, GCP

WORK EXPERIENCE

University of Illinois Urbana Champaign

May 2025 - Present

Research Assistant - iSchool

Champaign, USA

• Owned end-to-end analysis and development of **cross-platform system integrating** wearable data for 100+ users, enabling scalable **data ingestion** and insights

• Designed and optimized **PostgreSQL datasets** for high-volume data, improving query performance by 38% and enabling faster reporting

• Built robust **Python** workflows for data retrieval and summarization, improving multi-turn response accuracy by **43%** and supporting insights

• Developed **data workflows** for real-time processing of longitudinal datasets with focus on reliability and consistent analytical outputs

Research Assistant - CHI AI in Infodemic Management

January 2025 - May 2025

• Designed and deployed highly **scalable NLP analysis pipelines** in **Python** to process large datasets, reducing processing latency by **41%**

• Built distributed data pipelines using **Kafka** and **Neo4j** Streams for real-time, high-throughput data analysis and pattern detection

• Developed production-grade **APIs** and workflows to improve data access, reporting consistency, and reproducibility across processes

• Enabled large-scale data analysis across social media streams using **distributed system architecture** principles for better insights

Business Intelligence Group

August 2025 - December 2025

Technical Consultant

Champaign, USA

• Built and deployed scalable data system to analyze and retrieve insights from large datasets using **FastAPI**, **PostgreSQL**, and vector-based retrieval methods

• Designed efficient, fault-tolerant **ETL** pipelines to process and structure large document datasets for reporting and analytical use cases

• Improved system performance by **64%** through optimized indexing strategies and data processing improvements for faster analysis

• Developed backend services enabling real-time, high-performance querying and analysis of large-scale unstructured datasets

Swift Mobil Software Solutions Provider

July 2023 - October 2023

Data Analyst

Mumbai, IN

• Built interactive **Power BI** dashboards for **logistics** and **mobility KPIs**, reducing reporting time by **40%** and improving overall business performance visibility across operations

• Processed and analyzed large-scale operational datasets using **Python** and **PySpark** to identify trends, inefficiencies, and performance issues

• Developed **SQL** and **graph queries** to analyze operations, detect data quality issues, and improve root-cause analysis by **26%**

Pscope Technologies Pvt. Ltd.

January 2023 - June 2023

Data Analyst

Mumbai, IN

• Developed and maintained **20+ Power BI** dashboards across Sales, Finance, and Operations for enterprise clients, using **SQL** and **DAX** to support KPI tracking and decision-making

• Automated recurring **Excel**-based reporting workflows using **VBA**, reducing report preparation time by **42%** and improving data consistency across reporting cycles

Stu/Dio at Illinois

August 2025 - Present

Project Manager

Champaign, USA

• Led cross-functional team of **6** to deliver product updates for DeepCover, game, using performance data and insights to guide data-driven feature decisions

• Tracked **sprint** progress, delivery metrics, and **QA issues** through **JIRA**-based workflows, improving visibility and supporting on-time milestone delivery

PROJECTS

FMCG Sales Demand Forecasting

March 2025

View Project

• Analyzed FMCG **sales demand data** across categories and locations to identify trends, seasonal patterns, and key drivers impacting inventory decisions

• Built and compared forecasting models including **ARIMA**, **SARIMA**, and regression to evaluate demand patterns and improve forecast accuracy using RMSE and MAPE

• Derived actionable insights on promotions, pricing, and stock behavior, enabling better inventory planning and reducing stockouts and overstocking risks
